

Missouri Forest Industries

Secondary Wood Producers Directory

2009

Missouri Forest Industries

Directory of

Secondary Wood Producers

2009

John Tuttle, Tom Treiman and Donna Baldwin

This directory is a listing of secondary wood processors currently operating in the state of Missouri. Secondary wood processors are defined as *firms producing finished or semi-finished products from previously processed raw materials* such as logs, bolts, or unpeeled posts. Examples are manufacturers of pallets from lumber, handles from blanks or barrels from staves. It is estimated that there are over 1,000 secondary wood producers in the state, and this directory includes approximately 230.

Information was collected by the Missouri Department of Conservation. An effort was made to contact every known secondary wood processing firm in Missouri; however listing in the directory is voluntary. Some firms declined to be listed, so users may not find a listing for a specific manufacturer for which they are searching. Errors and corrections should be reported to:

Missouri Department of Conservation
PO Box 180
Jefferson City, MO 65102
(573) 522-4115 x 3304

Using this Directory

All listings in this directory are arranged in alphabetical order by company name within the county of their location. Alphabetical indices are provided by both company name and type of product.

In addition to name, address and contact information, each listing indicates the relative number of employees, species used, and the variety of products normally produced.

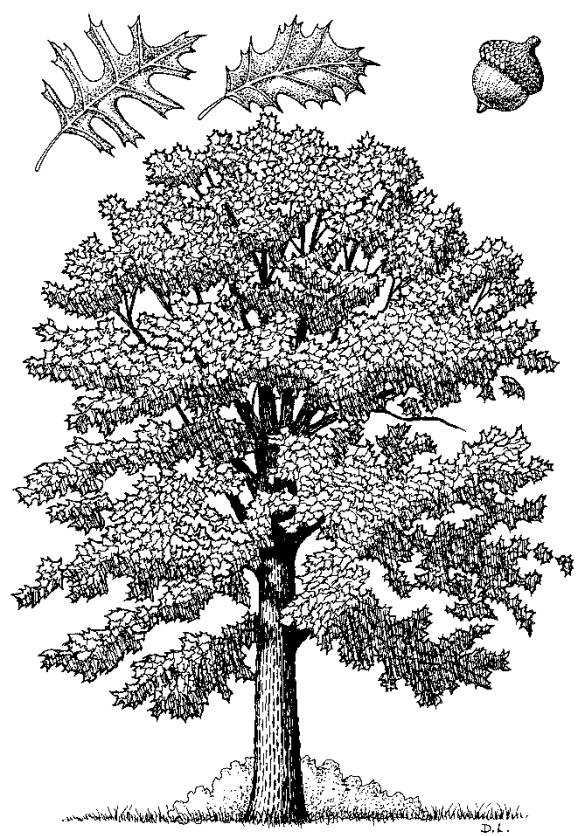

A searchable database is available on the Missouri Department of Conservation's website at www.mdc.mo.gov - click on Forestry, and then Forest Products.
